MR Precision Balances
Robust and Reliable

Designed for Convenience

Advanced technologies, including automatic adjustment and guided leveling, simplify daily weighing. Solidly built and with IP43, cleaning is easy too.

Easy Integration

Multiple interfaces and MT-SICS commands make it simple to connect your MR balance to PLC and MES systems as well as other lab instruments.

User Management

By setting up different user groups and profiles, operators see just the functions and applications they need to carry out their tasks, simplifying processes and reducing errors.

IP43 Protection

IP43 ingress protection prevents dirt and liquid spills from entering the balance, protecting the load cell and electronics. The robust design makes this balance suitable for use in more challenging weighing environments.

Your Weighing Partner
For All Environments

These reliable balances deliver consistently accurate results even in the toughest weighing environments. Built-in applications and multiple connectivity options make these durable balances highly versatile whether you're in the lab or out on the factory floor.

The full metal housing and durable components are tested in the harshest environments to ensure protection against dirt and chemicals. The overload protection safeguards the weighing cell against excess loads and accidental drops on the weighing pan.

When you don't need to use your balance, the configurable power-saving mode minimizes energy usage and saves costs.
